Perfect Talk · Confidential commercial offer · IPLANS Group · August 2026

01 / 06

What Perfect Talk changes

A virtual number is no longer a switchboard — it is your professional lifeline.

Perfect Talk assigns an international virtual number (DID) usable from mobile, tablet or desktop. One single number for your teams, clients and families, with no local SIM in every country.

01

One number, everywhere

France, United States, CEMAC or any available country code. The number follows you. Contacts keep a single reference.

02

Call each other, border-free

Calls between Perfect Talk users travel over data (Wi-Fi / 4G / 5G). HD quality, controlled cost.

03

Video and collaboration

Switch from audio to video in one tap. Share documents, photos, PDFs and folders during the conversation.

04

Reach the entire world

Call any landline or mobile outside the Perfect Talk network, at carrier rates negotiated by the Group.

05

Simple payment

Subscription, top-up and billing through PerfectPay (cards, Mobile Money, wire). One Group account.

06

Network continuity

Operated by IPLANS AMERICA and backed by Kakotel in Cameroon: voice, SMS, interconnection and 24/7 supervision.

Virtual number features

Talk · Chat · SMS · Video · Files — one application.

Calls between users

Unlimited HD audio between Perfect Talk accounts, whatever the country of connection. Dial by virtual number or contact.

Calls to the entire world

Termination to all landlines and mobiles (local, international, mobile). Per-minute rates shown before the call. Prepaid credit or corporate postpaid.

Video conferencing

1-to-1 and multipoint video. Switch audio → video without hanging up. Screen share for reviews, training and boards.

File sharing

Documents, images, PDFs, archives. Encrypted transfer in the conversation thread. History available on all your devices.

Chat & presence

Instant messaging, delivery receipts, online / busy / do-not-disturb status. Team groups.

SMS

Send and receive SMS on the virtual number (subject to country of the DID). OTP, business alerts, PerfectPay / Kakotel notifications.

Multi-device

The same number rings on smartphone, tablet and PC. Call pickup. Voicemail and transcription.

Administration

Console: number management, rights, spending caps, optional call recording, exports and PerfectPay billing.

Plans & proposed pricing

Monthly excl. tax · billed via PerfectPay · valid 30 days · volume adjustable
